HOSTILITIES RESUMED

JAP CAVALRY DESTROYS RAILWAY

Russians Chase and Destroy the battalion—Third Squadron has Sailed.

Bulletin Special.

Libau Feb. 16th:—The third Pacific squadron has left for the far east. It will join Rojestvensky beyond the Indian Ocean, the exact location being unknown.

St. Petersburg, Feb. 16th:—Despatches from Mukden report the wiping out of an entire battalion of Japanese cavalry which had destroyed the railway between Mukden and Harbin. The Russians overtook the raiders who refused quarter and fought till the last man was killed. A continuous artillery duel is in progress between the opposing armies, and the sound of heavy guns increasing in volume indicate a reopening of general hostilities.

St. Petersburg Feb. 16th:—In spite of the Czar's personal inclination for a land parliament a decision to summon this body has not been taken. The Emperor is carefully weighing the arguments for and against before committing himself. It is said however that if the Russian nation must be saved it must come quickly.

VERDICT REVISED

BY A REGINA JURY

Engineer of the freight found not guilty of negligence in Sinitlata disaster

Bulletin Special.

Regina, N.W.T., Feb. 16—Engineer Thomas Johnston appeared before Judge Newlands and a jury on a charge of manslaughter in connection with the Sinitlata disaster. The jury brought in a verdict of "Not Guilty." T. C. Johnston conducted the prosecution and Norman MacKenzie argued that the accused had taken all the ordinary precautions to insure the safety of his train. On September 1st last No. 11 westbound on board of which were Lord Minto and suite dashed through a open switch into a freight standing on the siding and resulted in the death of five people. The coroners jury found Thomas Johnston and J. A. Irwin engineer and conductor respectively of the freight train guilty of criminal negligence. The crown has withdrawn the charge against Irwin.

Unique Curling Match
Bulletin Special.

Winnipeg, Feb. 16th—A friendly game of curling was played last night between teams representing the extreme east of Canada and the extreme west. The westerners taking losers by one point on the last end. The scores were east of Montreal, Lyall 15, west of Medicine Hat, Pringle, 14.

Epidemic Abating
Bulletin Special.

Winnipeg, Feb. 15th—Only forty cases of typhoid fever have been reported this month. There are at present about 150 cases in the city and the epidemic is abating. The Winnipeg school board is asking that a by-law be submitted for \$200,000 for additional schools. The estimates for the year are \$250,000.

THE DOG QUESTION AGAIN.

The new Aldermanic body had its first set-to with the immortal dog problem on Tuesday evening, and emerged from the combat full of grit but not signally triumphant. Ever before the consciousness of preceding councils has hung an invisible but no less sapient motto, "Beware the dog." Nor was it ignorance or disregard of this rule which carried the new aldermen into the maelstrom, but what good are rules written on parchment, when a farmer writes to say that his dog, not a real dog, canine of the city nor amenable to the by-laws, has been seized, imprisoned and only saved from the fate of the murderer and the traitor by a ransom exacted under the guise of a fine for unpaid tax?

It was the old, old, story of a collie not versed in the wicked ways of the city who followed his master's wagon from the country one day but returned not with it at night. The sleepless eye of the dog catcher had searched him out and the pitiless heart had devised snares for his undoing. He fell as the unwary and guileless fall and the way that seemed right to him ended at the dog-pound. Then he was missed in his accustomed haunts and the search began which ended in his ransom.

This brought it up to the Aldermen and with the vigor of a newly elected body confident of the support of the electorate they wandered from the specific case in hand into the whole problem of the dog and how to keep him under control. To prevent the visible supply exceeding the legitimate demand within the city limits, the dog pound, on which the dog pound puzzle has reared itself and the discussion finally died down to this. After wrestling manfully with it for some time the Aldermen passed it on to the Commissioners. They will struggle with it until next meeting and return it for the further diversion of the council with their suggestions as to how it should be solved or might be circumvented.

SEED TESTING ON THE FARM.

(Continued.)

To find out who her seeds are capable of producing plants neither expert knowledge nor special apparatus. Satisfactory material is to be found in every farm home, for making germination tests of practically any kind of seed used on the farm. The simplest and most convenient way to test seed of corn and other cereal grains and most of the root crop and larger vegetable seeds is to place a number of them—say one hundred between pieces of moistened blotting paper. Gintan flannel or cloth set them in an ordinary dinner plate and invert another plate to cover them. The seed should be kept moist but not wet. The temperature of the average farm house living room would be quite suitable, but some care should be taken to guard against excessive heat or cold. All good strong seed of corn, cereal grains, clover or timothy, thus treated, will have germinated at the end of five days. Very small seeds of the finer grasses, or some of the garden vegetables and of beans or mangel may be germinated to better advantage by scattering them in a saucer (belonging to a flower pot) that has been soaked in water, and set in a cloth that should be kept damp, or in a pan containing not more than one-eighth of an inch of water, the object being to keep the saucer moist, but not wet. If such a saucer be not available, a brick will answer the purpose as well. In germinating seeds in an earthen saucer they may be exposed to the light, but not to the direct rays of the sun.

Monkey Brand Soap removes all stains, rust, dirt or tarnish—but won't wash clothes.

ROSS BROTHERS LIMITED

ARE THE SOLE AGENTS
IN EDMONTON FOR THE

MONARCH RANGE...

There is no question as to what this Range can do for durability, as thousands and thousands of them are in use on this continent, and so far as we have been able to learn no fault has yet been found with them.

The main body of this Range is built up of sheet steel, and all the other parts that require to be cast are malleable iron. The top is ground to a bright steel finish, and is so heavy that, no matter how long or how hot you heat it, you cannot make it warp or get out of shape.

You will notice that the oven has a drop door, and the above cut illustrates the strength of this door, as any man can stand on it when it is open without straining it in the least. This will give some idea of the strength of the Stove, as all its parts are as strong as this cut of the oven door open with the salesman standing on it would convey to you.

It is a wonderful baker, a very quick heater, and its water front is so constructed that it will heat water nearly twice as quick and on a much less quantity of fuel than any other Range now on the market.

The purchaser of a MONARCH RANGE insures a satisfaction that cannot be measured in dollars and cents, for at the end of ten years' use it will operate as easily and be just as good as when first started.

Remember the MONARCH when you want to purchase a Range

Ross Bros. Ltd.

WILL TEST WOOD PIPE

AS CONDUITS FOR CITY SYSTEM

Claims made for wooden water mains lead the council to recommend a test

The city council will experiment with wooden wire wound water mains. Such was the conclusion arrived at on Tuesday evening when Mr. D. Alton, representing the Canada Pipe Co., of Vancouver, addressed the board.

The pipes are made of wood wound with wire to give strength.

The makers claim great advantages for them over the iron pipes, among others, cheapness, greater durability, greater carrying capacity, convey water sweeter, more wholesome and lighter, easily handled, cheaply laid, safely and easily tapped for service. On all these counts they are said to excel the iron pipes while preventing frost bursts, electrolysis, corrosion and conduction.

Mr. Alton laid these and other arguments before the council and Ald. McLeod and Clark stated that they had been present during a test of the wooden pipes at the power house with a registered pressure of 340 lbs. per square inch had had no visible effect on the pipes.

On motion the commissioners were recommended to give the wood pipe a fair test on one of the extensions to be made to the present system.

DANCE AT WARWICK

The new general store of the Commonwealth Trading Co., Ltd., at Warwick, Alta., inaugurates its opening by giving a dance on Monday Feb. 6. Notwithstanding the fact that the thermometer registered 30 below, the young people for miles around, English, German and French turned out to the dance and spent a pleasant evening. The affair did not pass by without an accident. Mr. McKenzie one of the most intelligent and prominent settlers of the Vermilion country, on coming out to the dance fell out from the sleigh and had his shoulder dislocated. He had to be taken to Vegerville for treatment.

Celluloid Starch

Never Sticks. Requires no Cooking.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal.—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates, may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$750 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1,500 by 1,500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining. Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles, each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days. If the claim is within ten miles of a mining recorder's office, one extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party, ordinary claims only.

Rentry fee, \$10. Royalty at the rate of two and one-half per cent on the value of the gold shipped

from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining. Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent, is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and if less than \$5,000 must be expended annually. The lease includes all base metals, quartz, and coal, and provides for the withdrawal of unoccupied land for agricultural and building purposes.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company, having machinery on the land to be prospected, an area of 400 acres. Should the prospectors discover oil in paying quantities, and satisfactorily establish such discovery an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Department of Interior, Ottawa, September, 1903.

JAMES A. SMART

Deputy Minister of the Interior,

29 12 05

Made big enough for a big man to work in with comfort.

Has more material in it than any other brand of shirt in Canada. Made on the H.B.K. scale it requires 30 1/2 to 42 yards per dozen, whereas common shirts have only 32 to 33 yards.

That's the reason why the H.B.K. "Big" Shirt never chafes the armpits, is never tight at the neck or wrist, bands, is always loose, full and comfortable and wears well.

Each shirt bears a tiny book that tells the whole history of the "Big" Shirt, and also contains a notarial declaration that the H.B.K. "Big" Shirt contains 30 1/2 to 42 yards of material per dozen.

Sold at all dealers but only with this brand:—

No Reconciliation.

Bulletin Special.

Quebec, Feb. 15th.—Supporters of Gouin and Turgeon persist in saying that Premier Parent will retire within 24 hours. The Premier is equally persistent to the contrary. The cabinet met today but there was no quorum. There appears to be no chance of a reconciliation.

No Drawback Allowed.

Bulletin Special.

Washington, Feb. 15th.—No drawback can be allowed on Canadian wheat blended with American grain and exported. This is the judgement of the U.S. Senate. It reverses the opinion of Attorney General Moody who recently held that the drawback should be given. Senator McCumber said the effect of Moody's decision would be established free trade.

The Bospiel.

Bulletin Special.

Winnipeg, Feb. 15th.—The finals in the bospiel are in sight and today should see the finish of one of the most successful meetings ever held by the branch. The Tackett competition finished last evening, Napinka rink beating Portage la Prairie by two points. The winners take home prizes aggregating the value of \$600. Portage gets \$300 value. The American-Abel contest is in the eighth. Wiloughby of Regina being among the lucky ones.

British House Meets.

Bulletin Special.

London, Feb. 15th.—The first day's proceedings of the house which was opened by the King in person left the impression that the Conservative Government will hold out till the end of the session. The Premier said he would not tackle the final question and will avoid other difficult matters like the redistribution of seats. Liberal Leader Campbell-Bannerman assailed the Government on the Tibetan and South African policies.

Victorias Again Defeated.

Bulletin Special.

Winnipeg, Feb. 15th.—Portage la Prairie gave the Victorias a regular beating last evening at the Auditorium after the roughest game of the season here. The score was 8 to 7. The Victorias had all the better of the game but great goal tending by Dutchy Morrison won for his team. The Victorias are anchored in the last place now with the Rowing Club next.

Telegraphic Briefs.

Premier Parent of Quebec is calling a meeting of the cabinet for today.

Hon. J. M. Gibson, late Attorney General of Ontario is critically ill in the Hopkins hospital, Baltimore.

At Montreal—Mr. Fred Borden Minister of Militia was tendered a reception by officers of the district. He said contrary to past habits the war department funds will be detained for the use of the military force of Canada.

The Board of Trade will have Marine, Mercantile and railway committees in the future. S. C. Young is the new president.

At the Winnipeg bospiel Lawson of Cypress River was the McMullan Cup, with Hunter of Indian Head, winning third prize in the White Cup. Edwards of Indian Head was beaten by one score, Edwards 14 Simpson, Thistle, 15.

The Gardiner biscuit factory was burnt at Kingscote. Loss \$10,000.

The Winnipeg council will pass a by-law insisting on the full weight of loaves of bread.

Contrary to the expectations today many will see the end of the Winnipeg bospiel. There is a possibility of a tie up. Consequently it may be tomorrow before it may be decided at an end.

Figures published this morning show the average 6 weeks temperature for Winnipeg to be 8.43 below zero.

After an acrimonious discussion the Winnipeg council decided that the Mayor call a convention of city medical men to discuss the prevention of typhoid.

Fire destroyed the Doherty organ factory at Clinton, Ont. Loss \$30,000.

J. H. Leonard has been appointed manager of construction of the branch of the C.P.R. between Sudbury and Toronto. This will shorten the route between Toronto and Winnipeg 60 miles.

Sunlight Soap

reduces wash day drudgery and increases your leisure time. It is an easy, quick-cleansing soap that makes your clothes pure and white without the least injury. Hard or soft water will do and you don't have to boil the clothes.

Buy Sunlight.

Your grocer is instructed to refund your money if you are not satisfied.

HIGH SCHOOL LITERARY.

Another meeting of the High School Literary Society was held in the usual meeting place yesterday. The meeting was a success from beginning to end, because of the programme and also that the meeting was honored by the presence of two distinguished visitors, Mr. John A. MacDougall, and Mr. McKegg, the new school inspector. Both these gentlemen gave splendid addresses which were much appreciated by the scholars.

After the reading and adopting of the minutes by Mr. Andrew Minely the recording secretary, the programme commenced with an instrumental solo by Miss Lily Richardson. Then followed an artistic delivery of that great masterpiece "The address of Spartacus to the Gladiators" by Miss Kate Lawford.

Next came a vocal solo, "Daddy" by Miss Jessie Potter.

The next item was an instrumental by Walter Walker.

Then followed a humorous recitation by Fred Brandon.

The last item was a song by York Blaney.

Mr. MacDougall gave an address which was much enjoyed by the pupils as it gave them a great many words of advice and encouraged them in the work that they are doing.

He emphasized the fact that wealth was not the only thing to strive after—that a good name is rather to be chosen than great riches. His speech contained a great deal of splendid advice and was greatly enjoyed by the pupils.

Mr. McKegg gave a much appreciated address and after a vote of thanks to the two speakers the meeting closed with the singing of the National Anthem.

CURLING.

Two games were played in the Edmonton B. and M. Co. cup competition with the following result.

SECOND ANNUAL SHOW

POULTRY AND PET STOCK ASSOCIATION

Very large number of entries made—Judging completed today

The second annual exhibition of the Alberta poultry and pet stock association began in Robertson hall yesterday and continues today and tomorrow. The large lot of entries in all classes indicates the progress made by the association during its short history.

The exhibits include canaries, cats, fowls of all kinds and dogs of many breeds. The entries total up to nearly three hundred and close competitions will doubtless be found in many classes. Owing to the great number of exhibits the store underneath the hall was secured for the bench show.

Yesterday was occupied in judging and spectators were only admitted in the evening when a considerable number turned out and many were turned away during the afternoon when the judging was in progress. The awarding of prizes was resumed this morning and completed at noon and the public will be admitted this afternoon and evening and tomorrow.

The Canadian Northwest Homestead Regulations

Any even numbered section of Dominion Lands in Manitoba or the Northwest Territories, excepting 1 and 23, which has not been homesteaded, or reserved to provide wood lots for settlers, or for other purposes, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age to the extent of one quarter section, of 160 acres, more or less.

ENTRY.—Entry may be made per the district in which the land to be taken is situated, or, if the homesteader desires, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him. A fee of \$10.00 is charged for a homestead entry.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required by the provisions of the Dominion Lands Act and the amendments thereto, to perform the conditions connected therewith, under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of this Act, reside upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent, may be satisfied by such person residing with the father or mother.

(3) If a settler has obtained a patent for his homestead, or a certificate for the issue of such patent, countersigned in the manner prescribed by this Act, and has obtained entry for a second homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by residence upon the first homestead, if the second homestead is in the vicinity of the first homestead.

(4) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon said land.

The term "vicinity" used above is meant to indicate the same township or an adjoining or cornering township.

A settler who avails himself of the provisions of Clauses 2, 3, or 4, must or substitute 20 head of stock, with buildings for their accommodation, cultivate 30 acres of his homestead, and have besides 80 acres sub-subsistent.

The privilege of a second entry is

restricted by law to those settlers only who completed the duties upon their first homestead, to entitle them to patent on or before the 2nd June, 1899.

Every homesteader who fails to comply with the requirements of the homestead law is liable to have his entry cancelled, and the land may be again thrown open for entry. Application for patent should be made at the end of three years, before the local agent, sub-agent, or Homestead Inspector. Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands, at Ottawa, of his intention to do so.

Information.—Newly arrived immigrants will receive at the Immigration Office, in Winnipeg, or at any Dominion Lands Office, in Manitoba or the Northwest Territories, information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing land to suit them. Full information respecting the land, timber, coal and mineral laws, as well as respecting Dominion Lands in the Railway Belt in British Columbia, may be obtained upon application to the Secretary of the Department of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, Manitoba, or to any of the Dominion Lands Agents in Manitoba or the Northwest Territories.

W. W. CORY,

Deputy Minister of the Interior.

N.B.—In addition to Free Grant Lands to which the regulations above stated refer, thousands of acres of most desirable lands are available for lease or purchase from railroad and other corporations and private firms in Western Canada.

THREE YEARS OLD

WHEN the tobacco I have personally selected in Cuba is delivered at my factory, I begin a special treatment to still further cure it—

develop its delightful aroma.

This special treatment requires two to three years, depending on the "crop."

I work it thoroughly—through various processes of fermenting and drying in specially made apparatuses that enable me to keep the tobacco in each process at certain fixed temperatures and moist or dry at such a degree of humidity—necessary to bring out the virtues I insist on in each cigar.

By having the filler so aged and treated, I make my Pharoah a smooth, palatable smoke—one with a delicate incense-like flavor and very even combustion.

The binder and wrapper are the Connecticut Broadleaf and the imported Sumatra respectively—both tobaccos that delight the epicure.

THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment, The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is. In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy so far as education and enlightenment goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but, what is still more to the point, we have subjected this all important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, subways, docks, shipyards, vessels, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skilful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities, not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point, the various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore viewing things from this, the only proper light, the logical conclusion we must arrive at is that this twentieth century is the real iron age, the iron age of the past being merely the embryonic forecast of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question "since iron is practically the fundamental basis of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market with their product. There is more demand today than there ever was for a good iron mine, and this is especially applicable to certain countries and sections of countries.

Speaking of our own country—this vast Canada—with its limitless resources in the form of minerals, timber etc., here we have a young country, a growing country, full of great prospects and with a vast future. Undimmed by the fogs and mists of uncertainty or incompetence she looms up before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her downy bosom so surely must be iron control for us. With this iron she will build her railways—the Grand Trunk and the Canadian Northern, albeit in themselves a vast undertaking being an earnest of future and of still greater enterprise. She must have also bridges, ships, machinery and the thousand and one other necessities which she will surely one day become. Think of this, to build a nation! Grasp the stupendous meaning which this implies and ask yourself the question "How are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must import all her iron and by this we include steel, or she must supply her own iron. Would we, knowing that we have fruit in our gardens, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us pluck what we have ready to our hand, in other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work them, not indiscriminately throwing away money, but with careful consideration and with due regard to location and the probable measure of success which such location promises.

There are those who would say that the average percentage of iron

mines which are paying is small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rely rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own careless speculations, decry any form of mining; who, in short impede the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more then should he not take an active interest in building up his country by studying its natural resources and assisting to develop them? It almost devolves upon us as a duty, which we owe to our children, and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in that direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, being guided by past experience and backed up by statistics, for these are the testimonials exacted from us by nature before she will yield up her stores in trust for future generations. Taking the iron belts on this continent of America we find that they have their defined limits and their directions as truly as the arteries in the human body. For instance if we find the brachial artery near our arm pit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in mining parlance. It is not our design to bewilder the reader or prospective investor with a list of iron mines paying high dividends, nor do we sketch out a geographical chart of all the iron districts and loads on the American continent, but the following example will serve to show the well nigh infallibility of mining operations when carried out on the basis above illustrated. We refer to the world famed iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular claim is that of a gentleman who not only rejoices in the sobriquet of "Iron King" of Duluth. About twelve years ago he purchased eighty acres of timber land in the iron belt above named for the sum of \$100,000. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron oxides exposed on his land were valuable, and he sold the right to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$8,000,000. His income from this source alone is \$750,000 per day.

Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta, not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Amongst other experts, Mr. Wm. Blakmore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable." As it is more than likely from the character and occurrence of the deposits that the springs come from a stratified ore body below which could be developed by boring.

Alluding to a proposed expenditure of \$100,000.00 he said: "Having had thirty years experience in locating and working various iron deposits, I have no hesitation in saying that this is a valuable property and one which will satisfy the expenditure recommended."

The mineral deposits he finds by analysis consists of 45.2 per cent. of metallic iron from surface ore and he further states, not only could it be used to produce an excellent paint oxide, for which a market could readily be found, but it could also be used in combination with other ores or smelting of iron and steel manufacture, similar to that so successfully smelted at the Radnor range, Quebec province for many years.

Small wonder then that of this valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

A morning glass of

Abbey's Effervescent Salt

makes life worth living. It clears the brain and cleans the stomach, makes the bowels move naturally, gives an appetite for breakfast, and makes every day the best day in the year.

Hardware.

Imported Enamel Ware, Elite and Anglo. Have you inspected these high-class goods. If not, why not. We carry complete lines of Household Utensils. Every article guaranteed.

REVILLON BROTHERS, LIMITED.

We Offer \$1,000

For a Disease Germ That Liquezone Can't Kill.

On every bottle of Liquezone we offer \$1,000 for a disease germ that it cannot kill. We do this to assure you that Liquezone does kill germs.

And it is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact which gives Liquezone its worth to humanity; a worth so great that, after testing the product for two years, through physicians and hospitals, we paid \$100,000 for the American rights. And we have spent over one million dollars, in one year, to buy the first bottle and give it free to each sick one who would try it.

Liquezone—like an excess of oxygen—is deadly to vegetable matter.

Liquezone goes into the stomach, into the bowels and into the blood, to go wherever the blood goes. No germ can escape it and none can resist it. The results are inevitable, for a germ disease must end when the germs are killed. Then Liquezone, acting as a wonderful tonic, quickly restores a condition of perfect health. Diseases which have resisted medicine for years yield at once to Liquezone, and it cures diseases which medicine never cures. Half the people you meet—wherever you are—can tell you of cures that were made by it.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

Acts Like Oxygen.

Liquezone is not made by compounding drugs, nor is there any alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is an absolutely certain germicide. The reason is that germs are vegetables:

Dysentery—Erysipelas
Typhoid—Scarlet
Gout—Gonorrhea
Leishmaniasis—Gleets
All diseases that begin with fever—all infectious diseases—all contagious diseases—all the results of impure or poisoned blood.
In nervous debility Liquezone acts as a vitalizer, accomplishing what no drugs can do.

50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquezone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Liquezone costs 50c. and \$1.

CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to The Liquezone Company, 120-124 Wabash Ave., Chicago.

My doctor is: _____
I have never tried Liquezone, but if you will supply me a 50c. bottle free I will take it.

Give full address—write plainly.

Any physician or hospital not using Liquezone will be gladly supplied for a trial.

EDMONTON ALTA. CANADA
POPULATION. 7,500
CITY GOVERNMENT:—
Mayor, K. W. MacKenzie; Aldermen, C. May, K. A. McLeod, W. H. Clark, D. R. Fraser, J. R. Boyle, T. Bellamy, J. H. Picard, W. A. Griesbach.

Conveniences:—Waterworks, sewer systems, telephone system, electric lighting system, all owned and operated by the city.

Board of Trade:—President, J. H. Morris, Secretary, F. F. Tims.

Immigration Officer:—O. W. Sutter.

Educational Institutions:—Public and separate schools, high school, Alberta College.

CHURCHES:—Roman Catholic, Anglican, Presbyterian, Methodist, Baptist, German Baptist, Lutheran, Salvation Army.

TRAIN SERVICE:—Leaves for Strathcona 7.45 and 15.30. Arrives from Strathcona 9.15 and 11.50.

LOCAL

—Train on time.

—R. Scoble will referee the hockey match in the rink on Friday evening.

—The Operatic Society rehearsed in Gariepy's Hall last evening.

—Hockey practice at the rink this evening.

—The Driving Club hold their third matinee tomorrow on the exhibition grounds.

—J. D. Movier is in charge of a G. T. P. survey party which left the city today to carry on survey work about 100 miles east.

—The Alberta conference of the Methodist church will hold its annual meeting in Calgary on Thursday, May, 25.

—The funeral of the late Louis Valmore Gauvreau takes place from the family residence at the corner of Fifth street and Peace avenue at 10 a. m. tomorrow.

—The Edmonton Glove Co. have removed to the premises lately occupied by the Dominion Express Co. The building has been renovated and repainted and presents an attractive appearance.

—Ben Baker is opening a new barber shop in the store formerly occupied by Claxton the fruiterer. The shop is very tastily fitted up, the wall cabinet being a handsome piece of work being made entirely of native fir and highly polished. The grain of the wood is even more beautiful than oak.

—Application is being made to Parliament to incorporate "The Saskatchewan Bridge Co." for the purpose of building a railway and traffic bridge across the river between Strathcona and Edmonton. W. H. Biggar, of Montreal, is acting for the promoters who ask for power to issue bonds to raise money for the work and to build track and approaches to the bridge.

—The Ladies' Aid of the Public Hospital have secured the rink for tomorrow evening and will conduct it for the benefit of that institution. The band will be in attendance and a burlesque hockey match and skating races by amateurs promise plenty of amusement. All taking part in these events will join in the grand march at 8.30. General skating at 10.30.

—The Canada Lumberman:—Depression characterized the lumber and shingle business of British Columbia throughout the entire year. The unfavorable conditions which existed are well known to the trade generally. A large number of new mills were built in the year 1908, largely in anticipation of supplying the demands of the Northwest. The mill capacity soon became greater than the absorbing power of the market and overproduction followed, the situation being further aggravated by large importations of low grade American lumber.

—An invitation is extended to the Old Timers to attend the funeral of the late Louis Valmore Gauvreau tomorrow.

Hon. Wm. Elliott, Commissioner of Agriculture for the N.W.T., is in the city today and will address a convention in connection with the poultry and pet stock show in Sandison Hall this evening.

—Battleford Herald:—Yellow Sky, the Turtle Lake chief, died recently. He was head of the Saulteaux in this district and used his influence to keep them out of treaty. It is expected that the band will now come into the treaty.

—Battleford Herald:—Rumors were circulating about town last week that a double murder had been committed at Saddle Lake, but from inquiries at the Indian office, the matter is not quite so serious. The most reliable information is that word has been brought into Saddle Lake that a local Indian and an Indian from Moosomin's Reserve, named Etowekesik, had a fight with knives at a point about six miles from that place, and that both are wounded—how seriously is not known.

—The case of King vs. Lyons was completed in Supreme court yesterday. The taking of evidence and the arguments of counsel were completed during the afternoon and the jury retired early in the evening. They returned at 10 p. m. with a verdict of not guilty. The defendant was accused with having set out poison down in the Battle River country which resulted in the death of several head of cattle.

—Calgary Herald:—The return of a colony of 150 families of halfbreeds from the United States to their old homeland in the Canadian Northwest is announced in a letter received at the Archbishop's palace, St. Boniface, from the venerable missionary, Rev. Father Iacombe. The return of the colony was negotiated for by Father Iacombe with the Dominion Government authorities. The families emigrated to the States some years ago, but, in the words of the old missionary's letter, "they exposed to him their present miserable state" and asked that a territory be secured for them to locate on in the vicinity of St. Paul des Metis.

PERSONAL

Rev. Father Hetu and Beaudry went came in last night.

Rev. Fathers Holm and Beaudry went to Hobbema this morning.

A. T. Cushing visited Morinville on Tuesday.

S. A. Dickson formerly of Fort Saskatchewan has taken a position in the office of the clerk of the court.
